Voices from Satisfied Costumers

"Is it really my skin?" I'm so surprised with the difference!

After used it, I was really surprised and impressed by the change of my skin! Not only my face becomes smoother, brighter, and looks smaller, the bags under my eyes are also become better. After that I went shopping without putting any make-up!

【Ms. S.N. (29)】

Before After

The swelling gets better in the first try!

My corner of lips lift and my contour of face is refreshed. When I touch it, I can feel how smooth it becomes and my pores are gone! I am really surprised!!

【Ms. S.K. (37)】

Before After

My skin becomes clear and smooth!

After using this product, my skin becomes brighter. My face countour also becomes tighter and my skin becomes smoother. I would really like to continue using this product.

【Ms. N.S. 47歳】

Before After

Instruction for Use

- Apply it on your face after you wash and dry it up.
- We recommend you to use it once in 3~10 days.

Step 1

Open the gel's (B) lid and add the granule (A) until none left. Stir with spatula so the gel and granule can be mixed well.

*Please remember that the ratio between A and B should be 1 : 1.

Step 2

After it is mixed well, spread it on the entire face. Don't apply it too thin, rather spread it a bit thick.

*It is a portion for one time face masking.

Step 3

Leave it for about 15~30 minutes.

*The concentration of hydrogen can last for about 40 minutes.

Step 4

After that, take the gel with spatula and wash it with water or lukewarm water. (Please be careful not to rub your face with spatula too strong.)

*Do your daily skin care and please take a rest.

【Precaution for Use】

- Please be careful if there is irregularity happens at your skin when using our product.
- Please stop using it if there is a rash or bruise in your skin.
- Please stop using it if when using or after used it, your skin becomes reddened, swollen, itchy, irritated, white spotted or darkened. If you continue it, it may lead to a worse condition. Please directly go dermatologist.
- If it contacted your eyes, please wash it with water or lukewarm water directly.
- Please keep it out of reach of children.
- Please keep it on average temperature. Do not keep it on the extremely high or low temperature and please avoid direct contact with sunlight.

The cause of skin aging (oxydation) is mostly because of **Active Oxygen**

Active oxygen helps immunization system against viruses and bacteria which enter our body. However, if it is too much, it can cause a lot of trouble such as sickness and skin aging.

2 Great Antioxidant Power from “Hydrogen” and “Platinum Nano-Colloid”

BiEST Platinum Series is an ultimate anti-aging cosmetics which is focused to deal with active oxygen and skin troubles.

“Platinum Nano Colloid” can fight 11 types of active oxygen which cause skin aging and it has catalytic function which works continuously for around 26 hours. Moreover, Japanese Ministry of Health, Labour, and Welfare has recognized it as food additive, which means that it is a totally safe substance.

“Hydrogen” is the smallest molecule in universe. It can penetrate skin’s strong barrier through dermal absorption so it can diffuse to every parts of cells. It works as skin aging by reacting to free radicals inside body, which later can create harmless water.

Clever Ways to Draw Out **The Utmost Power of Hydrogen**

It's the Difference!

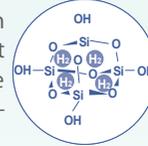

1. Generating high-concentrated Hydrogen

In other products, where hydrogen is only dissolved with gel or cream, the concentration of hydrogen is actually gradually decreasing. While our facial mask, it generates hydrogen by combining gel and granules right before it is going to be applied so it contains a high concentration of hydrogen.

2. Control the Releasing of Hydrogen

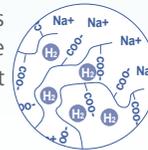

Because silicon entraps hydrogen molecule and creates a system where hydrogen is released gradually, skin can absorb a high concentration of hydrogen continuously. In comparison, most of similar products also capable to generate hydrogen. They create it by reacting magnesium with water. However, this method also

creates a by-product which is harmful for skin. Moreover, the reaction is so intense that hydrogen is released rather than to dissolve with gel.

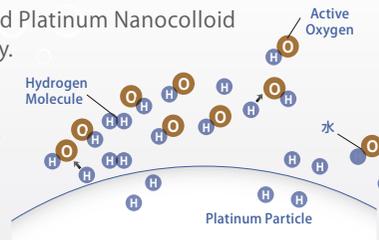

3. Prevent the Dissipation of Hydrogen with Gel

Because of the high densed gel which wraps hydrogen molecule tightly, hydrogen can be fully delivered to skin without letting some of it to escape to the atmosphere.

4. The Excellent Combination Between “Hydrogen” and “Platinum Nanocolloid”

Hydrogen molecule and Platinum Nanocolloid has a good compatibility. Platinum attracts hydrogen and makes it reacts to active oxygen easily, which means that it can rise its effectivity as antioxidant.

New Arrangement of Rich Ingredients to Deal with AGEs and Pollution

Glycation is a reaction between protein and remaining sugar (i.e. glucose) which leads to the formation of Advanced Glycation End (AGEs) products. Similar to oxidation, this reaction also speed up the aging process. While Anti-pollution cosmetic is cosmetic which protects skin from the pollutants.

[New Combination]

- Squalane
- Plantago Major Seeds Extract
- Somei Yoshino Leaves Extract
- Peony Roots Extract
- Scutellaria Roots Extract
