Visualizing rejuvenating ingredients

Extreme-FRESH NMN beauty serum

Overwhelming results with a unique container.

The key to keeping your skin youthful, NMN, had a weakness. NMN remains largely unchanged even when heated, as it is heat-resistant. However, when it dissolves in water, it starts to degrade, leading to a decrease in purity. Even high-purity serums that are already on the market may experience a decrease in purity over time as their ingredients dissolve. That's why Rejuing has succeeded in delivering fresh NMN directly to the skin.

Our unique, patented cap (Utility Model Registration No. 3229780) allows for the mixing of ingredients just before use, delivering active ingredients to your skin in a fresh state. That's why you can experience a remarkable difference in effectiveness.

What's in the cap.

NMN 99% or higher purity	Certified ingredient Niacinamide Wrinkle improvement
-----------------------------	---

Since 2017, it has been certified by the Ministry of Health, Labour and Welfare for 'wrinkle improvement.' It contains the raw materials of 'Niacinamide,' which was certified, and 'NMN,' the 'ultimate rejuvenation ingredient' discovered by Harvard University.

Rejuing

Rejuvenation & ing

There are many anti-aging cosmetics and beauty supplements in the market, but most of them only work to slow down or stop aging. The Rejuing brand was born with the hope of allowing you to experience an unprecedented 'ongoing rejuvenation' from both the inside and outside of your skin, by efficiently incorporating the much-discussed 'NMN,' referred to as the 'discovery of the century' at Harvard University, through its unique method.

Even more amazing beauty ingredients.

Limuveil® from the Kingdom of Tonga
~The Power of Fucoidan~

The waters of Tonga are known as the 'second deepest in the world' and are not polluted, rich in minerals. The ingredient 'Fucoidan' found in seaweed harvested from Tongan waters creates a smooth moisturizing protective film on the skin's surface, protecting it from dryness and allergens. It also prevents the degradation of elasticity caused by UV radiation through its antioxidant properties and guides the skin towards a trouble-free state with its healing capabilities.

Activated through the dual action of stem cells.

Human stem cell culture fluid extract

Plant stem cell extract

EGF

Hyaluronic acid

Collagen

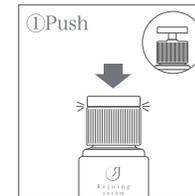

Proliferates gloss factors and 'natural moisturizing factors' to bring out transparency and firmness.

Various beauty ingredients are included to enhance the synergistic effects

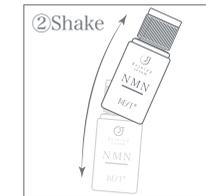

How to use the cap

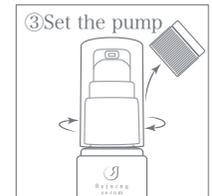

for both single bottle and 3 bottle set

Press the top part of the cap firmly down to the bottom to drop the ingredients inside the cap into the bottle.

Shake the bottle vertically at least 10 times to dissolve the ingredients into the beauty serum (It's okay if the powder doesn't mix completely).

Remove the gray cap and replace it with the included pump. Your beauty serum is now ready.
